Not illustrated. 1979* Excerpt: .on each side of the FFemont River along its entire length from the diversion site to the confluence with Muddy Creek for a total of aEout 200 acrelT Figure 2-15 is a photograph of riparian vegetation along the Fremont River. The Henry Mountains, southeast of the Caineville area, provide unique habitat for a number of plants which are rare or endemic to either the Henry Mountains or Utah (Welsh, 1977b). A list of proposed endangered plant species was published in the June 16, 1976 Federal Register. Lists of candidate threatened and endangered species have also been compiled, plants on these candidate lists may later be proposed DESCRIPTION OF ENVIRONMENT ANIMAL LIFE 2. Primary Project Area and Coal Haul Railroad The vegetation within the primary project area is predominantly cold desert type (see Figure 2-14). The vegetation along the proposed railroad route is shown on Figure 2-A....
